Professional Summary

Aspiring **Full Stack Web Developer** with a strong foundation in both **Front-End** and **Back-End technologies**. Skilled in **JavaScript, TypeScript, React, Next.js, Node.js**, and **Express.js**, with experience building scalable, user-focused web applications. Passionate about leveraging modern frameworks and **AI-enhanced solutions** to deliver efficient, innovative products within dynamic tech organizations.

Education

Chhatrapati Shahu Ji Maharaj University (Formerly Kanpur University)
Kalyanpur, Kanpur-208024
B.Tech CSE (Specialization in Artificial Intelligence)

November 2022 - May 2026
CPI: 8.11/10

Skills

Languages:	C++, Python, JavaScript, TypeScript
Web Technology:	Tailwind CSS, HTML, CSS3, Next.js
Front-End:	React(Hooks, Router), Redux Toolkit, Vite
Back-End & Frameworks:	Node.js, Express.js, REST APIs, JWT Authentication
AI/ML & Computer Vision:	OpenCV, face-api.js, DeepFace, FaceNet
Libraries/Frameworks:	Flask-SocketIO, React-Webcam, Socket.IO, Zod
Cloud & Tools:	Git & GitHub, Postman, Appwrite, Cloudinary(media storage & delivery)
Databases:	MySQL, MongoDB

Experience

Visionary-Advanced-Image-Recognition-for-the-Next-Era(Internship) | [Link](#)

3 Month
Remote

Tech Stack: React, face-api.js, Flask, Flask-SocketIO, OpenCV, DeepFace, FaceNet

- Developed a real-time face recognition system using Python, OpenCV, and TensorFlow by integrating live camera input for accurate individual identification.
- Led the complete machine learning pipeline, handling data collection, preprocessing, CNN-based model training, evaluation, and deployment for facial recognition.
- Drove the design and implementation of a user-friendly interface for image upload and result display using Flask.

Projects

VideoTube – Full Stack Video Streaming Platform | [Link](#)

Tech Stack: React, Redux Toolkit, Tailwind CSS, Vite, Node.js, Express, MongoDB, Socket.io, Cloudinary, Multer, JWT, Axios

- Developed a full-stack video sharing platform inspired by YouTube, enabling users **secure authentication and authorization** using JWT and bcrypt for user accounts.
- Integrated **Cloudinary** for efficient video storage and streaming, with Multer handling file uploads.
- Designed a **responsive frontend** with React, Tailwind CSS, and React Router for seamless navigation and modern UI.
- Utilized **MongoDB with Mongoose** for scalable data management, including video metadata, user profiles, and comments.

Anonymous Message Platform | [Link](#)

Tech Stack: Next.js, TypeScript, MongoDB, NextAuth, Zod, Tailwind CSS

- Built a full-stack anonymous messaging platform with secure authentication using NextAuth.
- Implemented email/code-based verification system for account security.
- Used Zod and React Hook Form for strong schema-based input validation.
- Integrated AI-powered message suggestions to enhance user engagement.
- Designed a user dashboard to manage and delete messages securely.
